Text Analysis

States Crime Overview

Text Analysis

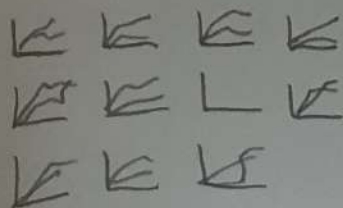

## Focus

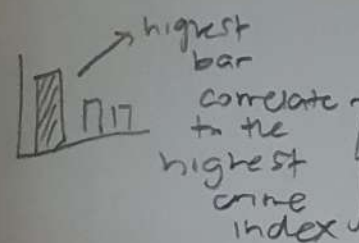

to see which state has the biggest bubble size

higher crime cases → bubble size ↑

the multiple small line charts help to compare the overall crime trend for each state at first glance

higher crime index, higher crime rate of that country

## Metadata

Title: Dashboard Layout

Author: Isaac Dass

Date: 25/9/2025

Sheet: 4

Task: Initial Design for the proportional map, multiline line chart, small multiple line chart, bar chart

## Components

- ↳ proportional graduated symbol map
- ↳ small multiple line charts
- ↳ bar chart
- ↳ multiline line chart

## Operations

- ↳ hovering over any of the points on the idioms will cause the tooltip to appear
- ↳ provides information regarding that point/data

## Discussions

### (Pro and Cons)

#### Pros

- ↳ The multiple small line chart which represent each state might help to show a clear trend and story regarding crime data for each state
- ↳ having each map represent its own crime type help to show a clear crime overview for each state

#### Cons

- ↳ having both the proportional graduated symbol map and small multiples might be redundant and a waste of space since they both focus on individual states
